# مدخل متكامل لإدارة التكاليف في ظل بيئة التصنيع الحديثة

## - دراسة حالة مؤسسة ALZINC -

2016-2015:

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

إلى والدي العزيزين  
إلى كل أفراد عائلتي  
إلى صديقاتي العزيزات

# الشكر والحمد

الحمد لله الذي هدانا لهذا وما كنا لنهتدي لولا أن هدانا الله، وإن أي توفيق فهو من الله عز وجل وأي تقصير فمني وحسبي أنني اجتهدت ولا حول ولا قوة إلا بالله. وأصلي وأسلم على نبي الرحمة ومعلم البشرية سيدنا محمد وعلى آله وصحبه أجمعين.

أتقدم بالشكر الجزيل إلى:

- الأستاذ الدكتور بلمقدم مصطفى الذي أشرف على هذه الرسالة وأفادنا بنصائحه وتوجيهاته.
- إلى عمال مكتبة العلوم الاقتصادية الذين قدموا لنا التسهيلات الضرورية.
- إلى عمال مؤسسة ALZINC الذين لم يخلوا علينا بمعلوماتهم.
- إلى كل من ساهم من قريب أو من بعيد في إتمام هذا العمل المتواضع وإخراجه إلى النور.

## Résumé

La gestion stratégique des coûts est devenue une nécessité dans un environnement caractérisé par la forte concurrence internationale, l'amélioration des technologies et des systèmes d'information. Le coût cible est considéré parmi les approches les plus importants pour la gestion stratégique des coûts. Il prend en considération les exigences des clients, il améliore la qualité et la performance du produit tout en maîtrisant les coûts. Dans cette étude, nous avons utilisé la méthode du  $\varepsilon$ -contrainte comme un outil quantitatif pour aider à atteindre le coût cible au sein de la société algérienne de zinc (ALZINC). Les résultats de l'étude de cas ont montré l'importance de la méthode du coût cible et la méthode du  $\varepsilon$ -contrainte dans la réduction des coûts et l'augmentation de la production, en tenant compte de la qualité et de la performance.

**Mots clés:** coût, gestion des coûts, environnement de fabrication moderne, coût cible, méthode du  $\varepsilon$ -contrainte.

## Abstract

The era of severe international competition, improved technologies and information systems have directed companies to use strategic cost management, particularly target costing, it is designed to develop products with specified functionality and quality to generate the desired level of profitability. Target costing uses a variety of techniques and methodologies to manage product design and cost such as reverse engineering, value engineering and quality function deployment. In this study, we have used the  $\varepsilon$ -constraint method as a quantitative tool to help achieve the target cost in Algerian zinc company (ALZINC). The results of case study showed the importance of target costing and  $\varepsilon$ -constraint method in reducing of costs and increase production, taking into account quality and performance.

**Keywords :** cost, cost management, modern manufacturing environment, target costing,  $\varepsilon$ -constraint method.
