titre:

Vapor-liquid equilibria of (water + glycerol) , (water + 1,3-propanediol), or (ethanol + glycerol) binary mixtures at several temperatures: measurements and modeling

auteur :

Manel ZAOU-DJELLOUL, Amina NGADI, Ilham MOKBEL, Jaque Jose, Latifa NGADI

Résumé :

Petroleum is the main energy source utilized in the world, but its availability is limited and the search for new renewable energy sources is of major interest

Vapor-liquid equilibrium (VLE) data are essential for the design of separation processes and equipment as well as for the extension of thermodynamic models

Vapor-liquid equilibrium (VLE) data are essential for the design of separation processes and equipment as well as for the extension of thermodynamic models
